Oscillating table, wall-mounting and
pedestal fans

DESCRIPTION

- Material: plastic resin able to withstand aging induced by exposure to sunlight (UV-resistant), and formulated with an antistatic compound to prevent accumulation of dust.
- Nominal diameter 300 mm
- 3 speed asynchronous motor with shaft turning in self-aligning and self-lubricating bushings; thermal overload protection.
- Motor housing equipped with hinge and clamp knob for adjustment of tilt angle.
- Oscillating mechanism (angle 90°) incorporated into housing, operated by auxiliary asynchronous motor.
- Manual on/off switch and speed selector control; operating status of the fan displayed by luminous indicators located on the base.
- Equipped as standard with IR remote control for switching the fan on and off, selecting the speed, programming the delayed shutoff function (½ h to 7.5 h), and activating the "breeze" option.
- Designed for wall-mounted installation, supplied without power cord.
- Maximum air flow 2,400 m³/h
- IMQ SAFETY and IMQ PERFORMANCE certifications
